Privacy Policy (GDPR)

Document control	
Company	LogistiComp S.A.
Document ID	LC-POL-006
Version	2.1
Classification	Internal – may be shared with customers under NDA
Owner	Data Protection Officer (DPO)
Approved by	Information Security Steering Committee (ISSC)
Effective date	15 January 2026
Next review	January 2027

1. Purpose

This policy describes how LogistiComp S.A. protects personal data and complies with the EU General Data Protection Regulation (GDPR) and Greek Law 4624/2019. It applies both when LogistiComp processes personal data on behalf of its customers and when it processes personal data for its own purposes.

This is an internal policy. Information for individuals about how LogistiComp uses their personal data is given in the separate privacy notice published on the Company's website.

2. Scope

This policy applies to all LogistiComp personnel and to all processing of personal data by the Company, in any system or format, including processing carried out by sub-processors on the Company's behalf.

3. Data Protection Officer

LogistiComp has appointed a Data Protection Officer (DPO), who has been registered with the Hellenic Data Protection Authority. The DPO reports directly to the CEO, is a member of the Information Security Steering Committee, and can be contacted at dpo@logisticomp.example. The DPO:

- advises the Company on its data protection obligations;
- monitors compliance with the GDPR and with this policy;
- maintains the records of processing activities;
- advises on data protection impact assessments;
- is the contact point for the supervisory authority, for customers and for individuals.

4. LogistiComp's Roles under the GDPR

Personal data	LogistiComp's role
Personal data that customers store in LogistiComp WMS	**Processor** – the customer is the controller
Employee and job applicant data	Controller
Contact details of customer and supplier representatives	Controller
Data about visitors to the LogistiComp website	Controller

5. Personal Data in LogistiComp WMS

LogistiComp WMS is designed to manage goods, not people, so it holds only a limited amount of personal data:

- **Users of the customer:** names, usernames, work email addresses, assigned roles and records of the actions they perform in the system.
- **Recipients of shipments:** names, delivery addresses and telephone numbers, where the customer includes them in orders.

Customers must not store special categories of personal data, such as health data, in LogistiComp WMS; this is prohibited by the customer agreement. LogistiComp WMS is not intended for processing personal data of children.

6. LogistiComp as Processor

- **Data processing agreement:** a data processing agreement that meets the requirements of Article 28 of the GDPR is signed with every customer as part of the customer agreement.
- **Instructions:** LogistiComp processes customer personal data only on the customer's documented instructions, which are set out in the customer agreement and given through the customer's use of LogistiComp WMS. LogistiComp does not use customer data for its own purposes and does not sell it.
- **Confidentiality:** everyone with access to customer personal data is bound by a confidentiality agreement (LC-POL-001, Section 8).
- **Security:** customer personal data is protected by the measures in the Company's information security policies.
- **Assistance:** LogistiComp helps customers respond to requests from individuals, carry out data protection impact assessments and meet their breach notification obligations.
- **End of the agreement:** customer data is returned and deleted as described in the Backup and Data Retention Policy (LC-POL-005).

7. Sub-processors

LogistiComp uses the following categories of sub-processors for LogistiComp WMS:

Sub-processor	Service	Location of processing
Microsoft Ireland Operations Ltd	Cloud hosting (Microsoft Azure)	EU (Netherlands and Ireland)
Managed security operations centre (SOC) provider	24/7 security monitoring	EU
Customer support ticketing provider	Support ticket management	EU

The current list of sub-processors is available to customers on request. Customers are notified **at least 30 days** before LogistiComp adds or replaces a sub-processor, and may object to the change on reasonable data protection grounds. Every sub-processor is bound by a written agreement with data protection obligations equivalent to those in LogistiComp's agreement with the customer, and is assessed under the Vendor and Third-Party Management Policy (LC-POL-009).

8. Data Location and International Transfers

Customer data in LogistiComp WMS is stored and processed only within the European Union, in the Microsoft Azure West Europe and North Europe regions. All LogistiComp personnel who can access customer data are based in Greece. LogistiComp does not transfer customer personal data outside the European Economic Area (EEA).

If a transfer outside the EEA ever became necessary, it would only take place with an appropriate safeguard under Chapter V of the GDPR, such as the European Commission's standard contractual clauses, after a transfer impact assessment, and after notifying customers in advance as described in Section 7.

9. LogistiComp as Controller

When LogistiComp processes personal data for its own purposes, it:

- processes it only on a valid legal basis, mainly the performance of a contract, compliance with a legal obligation or legitimate interests;
- sends marketing emails only to people who have given their consent or where the law otherwise permits it;
- informs individuals through privacy notices;
- keeps personal data only for the periods in the retention schedule in LC-POL-005.

10. Rights of Individuals

- **Where LogistiComp is controller:** requests from individuals to access, correct, delete, restrict or port their data, or to object to processing, are handled by the DPO

and answered within one month. This period can be extended by two further months for complex requests, in which case the individual is informed.

- **Where LogistiComp is processor:** requests from individuals about data in LogistiComp WMS are forwarded to the relevant customer within 5 business days, and LogistiComp does not answer them directly. Customer administrators can export, correct and delete personal data of individual users and shipment recipients using the functions of LogistiComp WMS.

11. Privacy by Design and Data Protection Impact Assessments

Data protection is considered from the start in the design of new features and processes. New processing that is likely to result in a high risk to individuals requires a data protection impact assessment (DPIA) reviewed by the DPO before it starts. Production customer data is not used in development or test environments (LC-POL-001, Section 12).

12. Records of Processing Activities

The DPO maintains records of processing activities as required by Article 30 of the GDPR, both for processing where LogistiComp is controller and for processing carried out on behalf of customers. The records are reviewed at least annually.

13. Personal Data Breaches

Personal data breaches are handled under the Incident Response Policy (LC-POL-003). In summary, affected customers are notified within 48 hours of a breach being confirmed, and, where LogistiComp is controller, the DPO notifies the Hellenic Data Protection Authority within 72 hours of the Company becoming aware of the breach.

14. Training

All personnel receive data protection training as part of the security awareness training described in LC-POL-001, at the start of their employment and annually thereafter. Personnel with regular access to customer data receive additional role-specific training.

15. Audits by Customers

Customers can verify LogistiComp's compliance with the data processing agreement in the first place through the ISO/IEC 27001 certificate and the other documentation the Company provides. In addition, a customer may carry out an audit, at its own cost, once per year with at least 30 days' written notice, or after a personal data breach affecting its data.

16. Review

This policy is reviewed at least annually by the DPO and approved by the ISSC.
